Dear Sir or Miss,

I am an eleven year old child writing to tell you about Mini Malt. This energizing drink really works to boost it also keeps them healthy. The reason why I like Mini Malt is because it tastes good and it's a thirst quencher but, that's only my opinion. Most of the times when I feel drained, I reach for a Mini Malt. I find just as how adults can have Red Bull, Gatorade, Lucozade and etc to give the energy we as children have Mini Malt to energise us.

I love how you make the different flavours and I also love that my mother can pack it for me to go to school and I can unscrew it easily. There is one problem it's a glass bottle which is unsafe for the younger ones to carry because it can break in their lunch kits and if they try to clean it up can get cut. Therefore I wish to you or box it with a straw. Looking forward to your reply

Yours Sincerely  
Kuara Carraby
